

PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Science student with hands-on experience in SAP CPI (Cloud Platform Integration) and a strong foundation in Machine Learning. Completed internship at Global Trust IT Services, where I developed and managed integration flows, worked with APIs, and handled data transformation.

I have also worked on projects like stress prediction using ML, applying data preprocessing and model building techniques. Along with technical skills, I possess strong problem-solving abilities, teamwork, and communication skills.

I am eager to start my career in a dynamic organization where I can apply my knowledge, learn new technologies, and contribute effectively to business solutions.

KEY EXPERTISE

SAP SQL Python Groovy XML JSON ML

EDUCATION

Sagar Group of Institutions - SISTec B.Tech. - Artificial Intelligence & Data Science - SISTec GN CGPA: 7.12 / 10	2023 - 2027
Holy Cross Co-Ed Sr. Sec. School, Bhopal 12 th CBSE Percentage: 70 / 100	2023
Holy Cross Co-Ed Sr. Sec. School, Bhopal 10 th CBSE Percentage: 73 / 100	2021

AWARDS AND SCHOLARSHIPS

- Runner up - Kho Kho Nodals 2023

INTERNSHIPS

Global Trust IT Services IT Product & Services Software Developer Intern	25 Sep, 2025 - 25 Jun, 2026
Key Skills: SuccessFactors Postman SAP CPI	
During my internship at Global Trust IT Services, I am working as an SAP CPI (Cloud Platform Integration) Integration Developer, gaining hands-on experience in designing and developing integration solutions on the SAP Business Technology Platform.	
I was involved in creating and configuring integration flows (iFlows) to enable seamless communication between different systems using protocols like HTTP, and RESTful APIs. I worked with data transformation techniques, including XML and JSON processing, message mapping, and routing.	
Additionally, I gained exposure to exception handling, monitoring, and debugging of integration processes to ensure smooth data exchange. I also learned to use adapters, manage endpoints, and implement basic security configurations.	
This internship helped me strengthen my understanding of enterprise integration concepts, cloud-based middleware, and real-time data processing, while also improving my problem-solving and teamwork skills in a professional IT environment.	

PROJECTS

AI Agent ChatBot

06 Jul, 2026 - 10 Jul, 2026

Mentor: Mr. Irfan Khan | **Team Size:** 1

Key Skills: LangChain Generative AI Agentic AI RAG

Project Link: https://github.com/Aamir-07/Agentic_AI_FullStackAPP-main

AI-Powered Intelligent Chatbot using Agentic AI, RAG & LangChain

Developed an AI-powered intelligent chatbot leveraging Generative AI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), LangChain, and Agentic AI concepts to provide context-aware and accurate responses. The chatbot retrieves relevant information from custom knowledge sources using RAG, enabling it to generate reliable, real-time answers beyond the base knowledge of LLMs. Built with LangChain, the application integrates prompt engineering, document retrieval, and LLM orchestration to deliver natural, conversational interactions. The project demonstrates practical applications of intelligent automation and AI-driven assistants for domains such as education, customer support, and knowledge management.

NueroPlan AI Study Planner

01 Jan, 2026 - 01 Jun, 2026

Mentor: Mr. Sachin Malviya | **Team Size:** 4

Key Skills: Python ReactJS NodeJS Pandas NumPy Matplotlib Deep Learning

Project Link: <https://github.com/Aamir-07/DASK>

NeuroPlan is an AI-powered study planning and productivity platform designed to help students organize their academic schedules efficiently. The system creates personalized study plans based on subjects, available study time, deadlines, and learning priorities. By leveraging Artificial Intelligence and Machine Learning techniques, NeuroPlan provides intelligent task recommendations, progress tracking, and adaptive scheduling to improve learning outcomes and time management.

The platform features a user-friendly dashboard where students can manage study goals, monitor their daily and weekly progress, receive reminders for upcoming tasks, and visualize their performance through interactive charts and analytics. The AI continuously adjusts study schedules based on completed tasks and changing priorities, ensuring an optimized learning experience.

My Portfolio

01 Apr, 2026 - 10 Apr, 2026

Mentor: Mr. Dheeraj Namdev | **Team Size:** 1

Key Skills: nextJS ReactJS HTML CSS Javascript

Project Link: https://github.com/Aamir-07/Portfolio_Aamir

This is my personal portfolio website, designed to showcase my skills, projects, certifications, and achievements as a Computer Science Engineering (AI & Data Science) student. The portfolio highlights my expertise in Artificial Intelligence, Machine Learning, Deep Learning, Web Development, and Database Management through interactive project demonstrations and a clean, responsive interface.

The website includes sections for my professional profile, technical skills, featured projects, certifications, resume, and contact information, allowing recruiters, collaborators, and peers to explore my work and connect with me easily. Built with modern web technologies, the portfolio focuses on performance, responsiveness, and an intuitive user experience across desktop and mobile devices.

Stress Prediction using ML

01 Oct, 2025 - 01 Jan, 2026

Mentor: Ms. Ruchi Jain | **Team Size:** 3

Key Skills: Django Python ML

Project Link: <https://github.com/Pragativishwakarma/MindWell-AI-Powered-Mental-Wellness-Stress-Detection-System-using-DJANGO.git>

This project focuses on predicting stress levels in individuals using machine learning techniques based on behavioral and physiological data. The goal is to identify patterns that indicate stress and provide early detection to support mental well-being.

The system uses datasets containing features such as sleep patterns, heart rate, work hours, screen time, and lifestyle habits. Data preprocessing techniques like cleaning, normalization, and feature selection were applied to improve model accuracy. Various machine learning algorithms such as Logistic Regression, Decision Tree, and Random Forest were implemented and compared to find the most effective model.

The model was trained and tested using appropriate evaluation metrics like accuracy, precision, and recall. The final system can classify whether a person is stressed or not based on input data.

This project helped in understanding real-world applications of machine learning, data analysis, and model optimization, while also highlighting the importance of mental health monitoring.

Hostel Management System

01 Oct, 2024 - 10 Oct, 2024

Mentor: Mr. Sachin Malviya | **Team Size:** 1

Key Skills: Java C C++ SQL

Project Link: <https://github.com/Aamir-07/MyJavaMiniProject>

Hostel Management System is a Java-based desktop application developed to simplify and automate hostel administration tasks. The system enables administrators to efficiently manage student records, room allocation, fee details, and occupancy information through a user-friendly interface. It replaces manual record-keeping with a digital solution, improving accuracy, reducing paperwork, and enhancing overall management efficiency.

PUBLICATIONS / RESEARCH / WHITE PAPERS

NeuroPlan: An AI-Powered Smart Study Planner

18 Jun, 2026

Research Paper (IEEE Conference Paper) | SISTec IEEE Conference | **Mentor:** Ms. Ruchi Jain | **No. of Authors:** 4

Key Skills: Artificial IntelligenceMachine LearningDeep LearningTypeScriptFront-End Web DevelopmentGithub

NeuroPlan is an AI-powered smart study planner designed to help students organize, prioritize, and track their academic activities efficiently. The system generates personalized study schedules, provides AI-based recommendations, monitors productivity through interactive dashboards, and adapts study plans based on user progress.

ACHIEVEMENTS

- Webmaster - IEEE Student Branch
- Editorial Team Lead - Student Activity Council

ASSESSMENTS / CERTIFICATIONS

AMCAT Aptitude

27 Dec, 2025

Provider: SISTec Gandhinagar Bhopal

Aggregate: 68 / 100

Subjects: Logical Reasoning, Comm Skills, Aptitude (60 / 100)

Key Skills: LeadershipIntelligenceIdeation

Successfully completed the Aspiring Minds Computer Adaptive Test (AMCAT), a standardized assessment designed to evaluate employability skills and job readiness. The certification covers key areas such as aptitude (quantitative, logical reasoning), English communication, and domain-specific technical skills.

The test follows an adaptive pattern, adjusting the difficulty level based on performance, ensuring an accurate evaluation of abilities. Through this certification, I demonstrated strong problem-solving skills, analytical thinking, and proficiency in core technical concepts.

This certification reflects my readiness for professional roles and my ability to perform effectively in a competitive environment.

AMCAT Spoken English

27 Dec, 2025

Provider: SISTec Gandhinagar Bhopal

Aggregate: 60 / 100

Subjects: English Speaking and Pronunciation (60 / 100)

Key Skills: EnglishCommunicationsInterpersonal CommunicationCorporate CommunicationsCommunity BuildingCommunication Skills

Successfully completed the AMCAT Spoken English Assessment, which evaluates verbal communication skills, pronunciation, fluency, grammar, and overall speaking ability. The test is designed to measure how effectively a candidate can communicate in professional and real-world situations.

Through this certification, I demonstrated strong spoken English skills, including clarity of speech, proper pronunciation, and the ability to express ideas confidently. It also reflects my readiness to communicate effectively in workplace environments, presentations, and team discussions.

This certification highlights my communication proficiency and my ability to interact confidently in English in both professional and social settings.

Python Essentials 1

Provider: Cisco

Key Skills: PythonObject-Oriented ProgrammingOOPsDebugging

Completed the Python Essentials 1 course, gaining practical programming skills in Python. Learned core programming concepts including variables, data types, loops, functions, object-oriented programming, exception handling, file operations, and debugging techniques, building a solid foundation for software development, automation, and data science.

Apply AI: Analyze Customer Reviews

Provider: Cisco

Key Skills: Artificial IntelligenceMachine LearningData VisualizationAnalytics

Successfully completed the Apply AI: Analyze Customer Reviews course through the Cisco Networking Academy. Learned how Artificial Intelligence and Natural Language Processing (NLP) can be used to analyze customer feedback, identify sentiment, extract insights from text data, and support business decision-making. Gained practical knowledge of AI-powered analytics and real-world applications of machine learning.

Data Analytics Essentials

Provider: Cisco

Key Skills: Data Analysis Visualization Microsoft Excel Statistical Data Analysis Data Processing

Completed the Data Analytics Essentials course, gaining a strong foundation in data collection, cleaning, analysis, and visualization. Learned to interpret datasets, identify trends, create meaningful insights, and support data-driven decision-making using analytical techniques and visualization tools.

Introduction to Cybersecurity

Provider: Cisco

Key Skills: Cyber Security Authentication Encryption Information Security

Successfully completed the Introduction to Cybersecurity course, developing foundational knowledge of cybersecurity principles, cyber threats, network security, encryption, authentication, and best practices for protecting digital systems and information.

Introduction to Data Science

Provider: Cisco

Key Skills: Data Science Data Analysis Data Validation Data Classification

Completed the Introduction to Data Science course, gaining knowledge of the data science lifecycle, data analysis, visualization, statistical concepts, and machine learning fundamentals. Learned how data-driven techniques are applied to solve real-world problems and support business decisions.

Introduction to Modern AI

Provider: Cisco

Key Skills: Artificial Intelligence Machine Learning Neural Networks Deep Learning

Successfully completed the Introduction to Modern AI course, learning the fundamentals of Artificial Intelligence, Generative AI, machine learning, deep learning, prompt engineering, and responsible AI practices. Developed an understanding of how AI technologies are transforming industries and solving real-world challenges.

POSITIONS OF RESPONSIBILITY

IEEE Student Member

Achieved **IEEE Student Membership**, becoming part of the **Institute of Electrical and Electronics Engineers (IEEE)**, a globally recognized professional organization. This membership reflects my interest in advancing knowledge in the fields of technology, engineering, and innovation.

As an IEEE student member, I gained access to technical resources, research papers, webinars, and professional networking opportunities. I also participated in workshops, seminars, and technical events organized by the IEEE student branch, which enhanced my technical knowledge and practical exposure.

This certification highlights my commitment to continuous learning, professional development, and staying updated with emerging technologies in the IT and engineering domain.

Student Coordinator Sagar Fiesta

Awarded a certificate for active participation as a **Student Coordinator**, recognizing my contribution in organizing and managing academic and technical events. In this role, I assisted in planning, coordinating, and executing various activities, ensuring smooth event operations.

I worked closely with faculty members and team members to handle responsibilities such as communication, scheduling, and participant management. This experience helped me develop strong leadership, teamwork, and organizational skills, along with the ability to handle responsibilities under pressure.

This achievement reflects my proactive involvement in extracurricular activities and my ability to contribute effectively to team-driven initiatives.

SEMINARS / TRAININGS / WORKSHOPS

IT Networking Fundamentals Institute Name: Udemy

17 Jun, 2026 - 17 Jun, 2026

Key Skills: LAN MAN WAN IP Addressing Routing Networking

Successfully completed the IT Networking Fundamentals for Beginners course on Udemy, gaining a strong foundation in computer networking concepts. The course covered network architecture, IP addressing, network devices, routing and switching basics, network protocols, and troubleshooting techniques. This training strengthened my understanding of how computer networks operate and prepared me for further studies in networking, cybersecurity, and cloud technologies.

Web and Android Development

01 Dec, 2024 - 31 Dec, 2024

Institute Name: Sagar Group of Institutions - SISTec

Key Skills: Problem Solving Team Coordination HTML5 CSS

Successfully participated in the Tech Winter Break Campaign organized by the Google Developer Group (GDG) On Campus, Sagar Institute of Science & Technology (SISTec) in December 2024. The program included hands-on training sessions focused on Web Development and Android Development, covering modern development tools, programming fundamentals, UI design, and practical application development. The campaign enhanced problem-solving abilities, coding practices, and real-world software development skills through interactive learning and technical workshops.

Cloud Chronicles: Azure Data Fundamentals 29 Apr, 2024 - 15 May, 2024

Institute Name: Microsoft Learn Student Ambassadors

Key Skills: Microsoft Azure Cloud-Computing Cloud Services Data Analytics

Successfully completed the Cloud Chronicles: Azure Data Fundamentals Challenge organized by the Microsoft Learn Student Ambassadors from 29 April 2024 to 15 May 2024. The program introduced the fundamentals of Microsoft Azure, including cloud computing concepts, Azure data services, storage solutions, databases, data processing, and cloud security basics. The challenge enhanced my understanding of Azure's data ecosystem and strengthened my practical knowledge of cloud technologies and modern data management.

Git and GitHub 22 Apr, 2024 - 22 Apr, 2024

Institute Name: Sagar Group of Institutions - SISTec

Key Skills: GIT Github

Attended a training program on Git and GitHub, where I learned essential version control concepts such as creating repositories, committing changes, branching strategies, merging, and resolving conflicts. I also gained hands-on experience in using GitHub for collaboration, pull requests, and project management.

Foundation of Azure AI Fundamentals 26 Feb, 2024 - 11 Mar, 2024

Institute Name: Microsoft Learn Student Ambassadors

Key Skills: Natural Language Processing Artificial Intelligence Microsoft Azure

Successfully completed the A Foundation of Azure AI Fundamentals Challenge organized by the Microsoft Learn Student Ambassadors from 26 February 2024 to 11 March 2024. The challenge introduced the fundamentals of Artificial Intelligence on Microsoft Azure, including machine learning concepts, Azure AI services, Cognitive Services, Computer Vision, Natural Language Processing (NLP), Generative AI basics, and Responsible AI principles. The program strengthened my understanding of AI technologies and their implementation using the Microsoft Azure cloud platform.
